

Boosting Virtual Reality Learning
within Higher Business Management Education

www.vrinsight.org

Co-funded by the
Erasmus+ Programme
of the European Union

Project

The VRinSight project aims to roll-out Virtual Reality learning in Higher Education and in the teaching of business management across Europe through a partnership from education and industry. The project runs over a 2 year period co-funded by the EU Erasmus plus program.

Results

Through an EU Survey of SMEs & Higher Education Institutes, the VRinSight project aims to understand the challenges involved in introducing VR learning techniques to business management education. The project offers a complete VR integration guide to educators through a unique VR Training Program and accompanying VR Training Curriculum carefully crafted by the expertise of the project partnership, outlining the methods, skills and technologies required. Additionally the VRinsight Project offers a comprehensive Green Paper on Virtual Reality Teaching & Learning giving educators, business and policy makers across Europe an insight on how VR technology can be embraced.

Info

Reach out and stay informed about the latest developments in the VRinSight project and on how we can guide you on your journey into Virtual Reality.
